

Resolved Issues | 16.28.0

This section lists the issues resolved and patches made to the EDGE platform in this release.

Issue #	Issue Description
EDGE61-10096	The problem that caused the incorrect amount of stock to be released to providers after a backorder release scheduler task was run has been fixed.
EDGE61-10627	The issue where an Order Import with batching that referenced the same client reference/PO failed to process the subsequent orders in the same batch has been resolved.
EDGE61-10672	The problem where opening the Order Details page for a large order timed out before processing completed has been fixed.
EDGE61-10824	The problem in the OpenTools Sales Order message where tax discrepancies were caused as a result of a tax amount being shown on both the BTO Header level and for first component has been fixed. Note to upgrading clients: <i>OrderDetail/Tax and OrderDetail/Duty Tax will be included for BTO Header SKU and NOT for BTO Component SKU.</i> <i>Refer to OpenTools Message Enhancements on page 16 for related information.</i>
EDGE61-10831	The issue that caused additional shipping and handling charges to be calculated for a replacement order after modification was made to the address has been resolved.
EDGE61-9628	The issues that caused (a) only one tracking number to be displayed in the Track Order section of the CSP for a completed order composed of multiple partial shipments and (b) duplicate tracking numbers for each shipment to be displayed in the Show Profile section have been resolved.
EDGE61-9660	The problem that caused the information for only one item to be included in an "Order Placed" notification email when the order is placed for a catalog item associated with multiple SKUs has been fixed.
EDGE61-10843	The problem where catalog files were not shown in the "Cart Cross Sell" block on EDGE/CMS-powered websites has been fixed.
EDGE61-10845	The issue where the "Cross Sell Item" cells were not rendering properly in the carts for EDGE/CMS-powered websites has been resolved.
EDGE61-10959	The problem that caused a Core error when an alternate shipping address was selected on the checkout page of an EDGE/CMS-powered website has been fixed.
EDGE61-10703	The problem that caused the transaction status to be displayed as "Completed" instead of "Refunded" after processing of a refund for an order placed using a gift certificate has been fixed.
EDGE61-10329	The issue that caused error "Error Processing Incoming Message - OrderImport - variable [COMMUNICATIONOBJ] doesn't exist" for gift card purchases generated via the Order Import message has been resolved.
EDGE61-7324	The issue that caused error "Error Processing Incoming Message - OrderImport - key [CARDNUMBER] doesn't exist " for gift card purchases generated via the Order Import message has been resolved.
EDGE61-10485	The problem that caused the Release Date field to incorrectly display the current date for orders placed in both the CSP and Manual Order portal with release date set in the future has been resolved.
EDGE61-10919	The issue where the status (e.g., Out for Delivery) in the tracking status bar does not match the status (e.g., Order Processed: Ready for UPS) shown in the Package Progress section of a completed order's Tracking Details page has been resolved.
EDGE61-11365	The issue where the tracking information could not be loaded onto the Tracking Details page has been resolved.
EDGE61-11478	The issue where a saved order was not getting shipped for an "Authorization" transaction has been resolved.
