

Affirm

Use the values in the tables below to configure the **Affirm** payment provider/authorizer with the described settings.

Authorizer

(The procedures for accessing and configuring these settings are described in [Add an Authorizer.](#))

Parameter	Value	Comments
AUTHORIZER NAME	Affirm	Can be any meaningful value.
AUTHORIZER CODE	Affirm	This value should exactly match the provider/authorizerBean implementation. (Service Implementation Bean is a term used in Java Platform, Enterprise Edition, for a Java object implementing a Web service.) Do not change if you are not sure.
SITE URL		The field must be populated, but the value is not currently used. Any value is valid. Suggest using specified values for consistency/clarity.
Test	https://sandbox.affirm.com/api/v2/	
Production	https://api.affirm.com/api/v2/
