

# OpenTools XML Message Enhancements | EDGE 16.28.0

The following OpenTools messages have been modified or added to improve the EDGE standard integration layer.

Enhancements	
1.	<p>In the <b>ASN Add/Edit</b> message, a new "ExternalReferenceNo" element has been added under: <b>/Message/body/ASN/ASNHeader</b></p> <p>This node can be used to specify an external reference number associated with a return order.</p> <p>Impact on upgrading clients: <i>Additional XML element is available</i></p> <p>Backward compatibility considerations: <i>None</i></p>
2 ..	<p>In the <b>Order Shipped</b> message, when the "Cancel Sales Order line if zero shipped" message type setting is set to "Yes," a void is now issued to the payment provider in order to free up funds on the customer's credit card.</p> <p>Impact on upgrading clients: <i>None</i></p> <p>Backward compatibility considerations: <i>None</i></p>
3.	<p>In the Sales Order message, the behavior has been modified so that the entire Line tax amount for build-to-order (BTO) items are now sent on the BTO Header level and all BTO components have "0" specified for tax.</p> <p>Impact on upgrading clients: <i>None</i></p> <p>Backward compatibility considerations: <i>None</i></p>

### Business Benefit

Continually adding to and improving the OpenTools messages in the standard integration layer helps ensure that EDGE can be seamlessly and quickly integrated with other systems.
