

Verify Fulfillment Provider Settings

All tax calculation services require that the configurations for all providers associated with a merchant's warehouse/fulfillment center contain accurate location address settings.

i In this context, the term "providers" refers to companies that support a merchant by providing fulfillment of the goods and/or services offered to the merchant's customers. Fulfillment providers are among a variety of organizations, including [tax calculation service providers](#) and [payment services providers](#), that are needed to support an eCommerce business.

During this configuration process, it is advisable for you to verify those fulfillment provider addresses and make any necessary modifications. Provider configurations are managed in the EDGE **Logistics** module.

View/Verify Fulfillment Provider Settings

To verify provider settings:

1. Click  **Logistics** in the module selection menu. The **Logistics** page opens with the **Ship Methods** list page displayed.

2. Click **List>Providers** in the left navigation menu. The **Providers** list page opens.

PROVIDERS

- Modify the address information as necessary. *(You may also make any other needed modifications at this time.)*
- Click  **Submit** at the bottom of the page to save the changes. The **Provider Details** page reopens, reflecting the modified information.
- Click the [RETURN TO PROVIDER LIST](#) link to exit the **Provider Details** and return to the Provider list page.
- Repeat steps 3 through 8 for each provider.

 **To continue . . .**

To take advantage of the many tax rules that power a tax engine, each of the products and/or services sold by a merchant should be mapped to a related product tax code. To do this, separate EDGE tax class types may be defined for each comparable tax code. So, when you have finished verifying the fulfillment provider settings, continue with [Configure EDGE Tax Classes](#).
