

Special Character Support for Order Reference Fields | EDGE 16.35.0

EDGE now supports ampersand (&) in **Orders** module fields "**External Reference**" and "**Client Reference**" in both EDGE and OpenTools Order Import.

Enhancements	
1.	Support for special character ampersand (&) has been added to the following areas of the Orders module: <ul style="list-style-type: none">• Editing of an existing order in EDGE• Creating a new order in EDGE, e.g. Customer Support Portal
2.	Support for special character ampersand (&) has been added to the following OpenTools messages: <ul style="list-style-type: none">• Order Import

Business Benefit

Expanding EDGE support for special characters makes Jagged Peak clients better able to meet the requirements of both their domestic and international customers as they compete in the global marketplace.
