

# Support for Affirm Payment Provider/Authorizer

The **Affirm** payment processor is now supported for the following:

- Capture of payment that occurs upon the full or partial shipment of items included in an order
- Capture of payment for externally generated orders imported into EDGE
  - Capture of payment for orders placed in Agile
  - **Refund** of payments for orders originating in an Agile front-end and captured via Affirm

**Note:**

*Refunds can be made back to the Affirm account or via e-gift card.*

Enhancements	
1.	Affirm is now supported for capture of payment for items shipped via the Warehouse Management System (WMS).
2.	Affirm is now supported for capture of payment for items shipped via the EDGE provider applications, StorePoint and the Vendor Portal.
3.	Affirm is now supported for capture of payment for items shipped via EDGE Back Office.
4.	Support for Affirm has been added for OpenTools <b>Order Import</b> for transactions that originated within third-party front ends.
5.	Agile now supports Affirm as a checkout option.
6.	All means of creating and approving returns that involve a refund of payment made via Affirm are now supported.
7.	All means of creating and approving cancellations that involve a refund or void of payment made via Affirm are now supported.

## Business Benefit

With EDGE support for Affirm, Jagged Peak clients are able to provide an increasingly broader range of payment method options for their customers and more fully support the life cycle of events associated with an order.

**FYI . . .**

*Affirm is a third-party payment provider/authorizer that manages transactions between the merchant and customer. Full payment for goods or services is made to the accepting merchant by Affirm while the customer pays off their purchase in fixed monthly payments to Affirm.*
