Configure Authorization Info Parameters

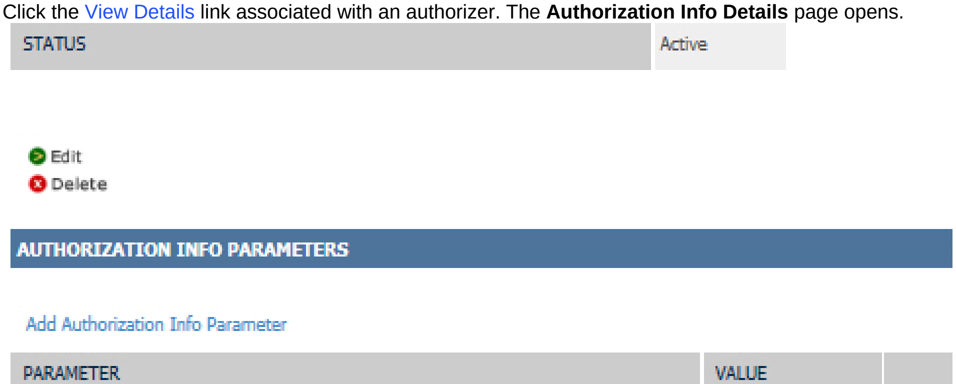
Use this function to configure additional, provider-specific Authorization Info parameters for the payment provider specified in the **Authorizer Name** field described in **Add Authorization Info**.

> **Note:**
>
> *These are the general instructions for adding authorization info parameters. An individual payment provider/authorizer may require a particular parameter or set of parameters that applies only to that provider.*
>
> - ***For the settings you need to use to define authorization info parameters required for each individual provider/authorizer refer to Configuration Setting by Provider/Authorizer.***
> - *For information about optional authorization info parameters that were developed by Jagged Peak for use in EDGE, refer to **Optional Authorization Info Parameters**.*
> - *If no Authorization Info Parameters are needed for the authorizer you are configuring, then you can skip this procedure and continue with **Configure Project Settings**.*

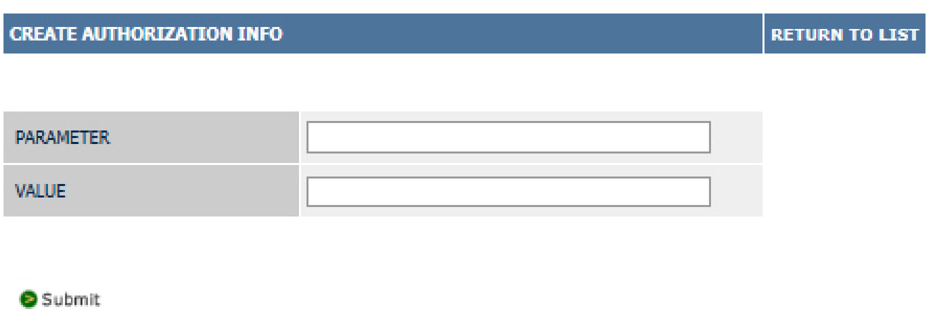
To configure an authorization info parameter:

> **Note:**
>
> *If an **Authorization Info Details** page is already open, go directly to **step 4**, below.*

1. Click **System Admin** in the Administrative tasks menu. The **System Admin** page opens with the **Project Settings** page displayed.
2. Select **EDGE Setup>Authorization Info** from the left navigation menu. The **Authorization Info** list page opens.
3. Click the View Details link associated with an authorizer. The **Authorization Info Details** page opens.

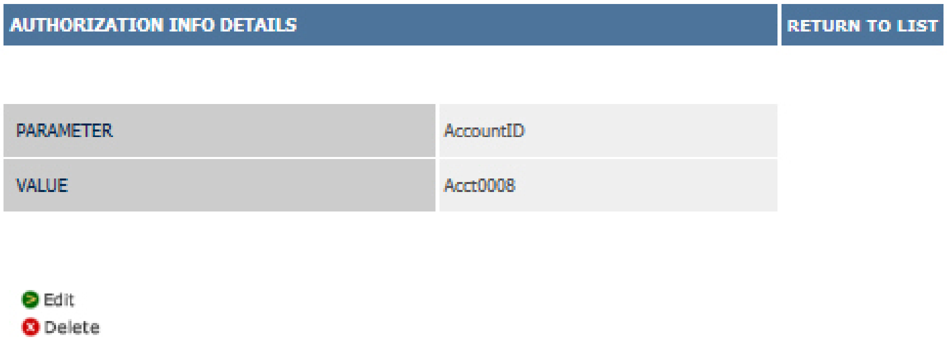


4. Scroll to the **Authorization Info Parameters** section and click the Add Authorization Info Parameter link. The **Create Authorization Info** page opens.

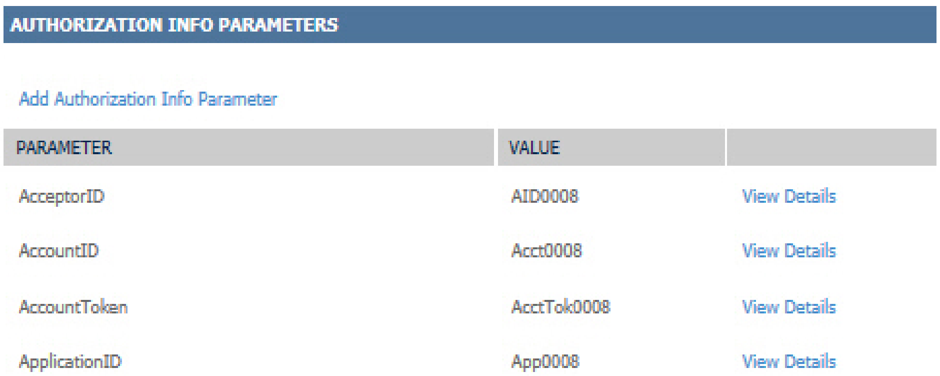


5. Enter a **Parameter** in the field provided. *(See **Configuration Settings by Provider/Authorizer** for information about required parameters.)*
6. Enter a **Value** for the parameter.

7. Click **Submit** to save the parameter. The parameter-specific **Authorization Info Details** page opens.



8. Click **RETURN TO LIST** to return to the **Authorization Info Details** page, where the parameter is listed in the **Authorization Info Parameters** section.



Repeat steps 4 through 8 for each parameter you want to add.

9. Click **RETURN TO LIST** to return to the **Authorization Info** list page.

To continue . . .

Once you have completed configuring the Authorization Info Parameters, if any, for the authorizer, continue with ***Configure Project Settings****.*
